

EXHIBITION FEEDBACK

- What do you think is the topic for this exhibition?

- What did you learn from this exhibition?

This exhibition has been created with images printed from computer as opposed to actual objects.

- If the Art Exhibitor had to create this exhibition with actual objects instead of computer images, many considerations, such as finding and designing an exhibition space, the size of the objects, the lighting for the exhibition, the placement of objects in the room would have been different. Which aspect do you think would change the exhibition the most?

- What are the advantages and disadvantages of the “virtual exhibition”?
