

Join us! Brooklyn, New York

Asia Society's Partnership for Global Learning strives for every U.S. student to be prepared for college and work in a global economy. Our annual conference allows teachers, administrators, and business leaders to share best practices on a unified front in advocating for policy change to support a world-class education for every student.

June 27–28, 2014

Where we work

CONFERENCE STRANDS

DEEPER LEARNING
Gain the teaching skills and knowledge that an ever-changing world demands.

GLOBAL ISSUES
Examine critical questions and themes to gain a better understanding of the world.

A DIGITAL WORLD
Create a truly global environment, right in your own classroom.

LANGUAGE MATTERS
Help students thrive with multilingualism—at school and in the world beyond.

Tomorrow's world is created in classrooms today.

The world is transitioning to a global innovation economy. Asia Society's Global Learning and Leadership work is defining and putting into practice the type of education students need in order to thrive in the world. Our annual conference brings teachers together to spread the best ideas and models. Working with teachers today will pay countless dividends in the years to come. Upon graduation, globally competent students will:

INVESTIGATE THE WORLD

WEIGH PERSPECTIVES

COMMUNICATE IDEAS

TAKE ACTION

SPEAKERS PAST + PRESENT

Dan Rather
Journalist

Deb Delisle
US Department of Education

Chuck Hagel
US Department of Defense

Dr. Tererai Trent
Tinogona Foundation

... and many more!

50 WORKSHOPS HANDS ON + INTERACTIVE

Teachers will have access to nearly 50 hands-on workshops. Each workshop provides a framework, simulation of student learning, and resources to take back to the classroom.

OPEN EDUCATION DATA-PROVEN MODELS

Some core tools—like Common Core-aligned global learning frameworks—are placed in the public domain, free of copy right. Teachers are free to use, adapt, and redistribute.

“ The world is enriched and we all win when everyone gets globally smarter.”

– U.S. Secretary of Education, Arne Duncan

The global age demands a new type of citizen, one that can solve problems and grasp opportunities—in more than one language. It’s up to educators to provide for it. But it’s a big task. How do they go about it?

Asia Society’s Global Learning conference understands that teachers are the driving force behind effective learning. We bring together the most innovative, successful educators and the models they’ve created. They exchange ideas and prepare to take their work to a new level.

We take special care to involve educators from the greatest-need districts. Access to a good education is nearing a crisis. We need to build knowledge and skills among all our students because our collective future also demands that no great mind is left untapped.

Can the next generation of great Americans count on your support?

Supporting this conference means you’ll provide under-resourced teachers access to the ideas and tools they need to prepare students for college and the interconnected world beyond. See sponsorship opportunities below, or call us to design a custom-support package.

THE GLOBAL AGE

Vast majority of consumers of American goods and services are outside of U.S. borders.

Two-thirds (and growing) of purchasing power worldwide is also abroad.

Nearly all American companies doing international trade are small or medium sized.

Today’s students have more than a one-in-five chance of a career working in international trade.

But 16% of youth remain unemployed. Businesses cite lack of competitive skills for the new economy.

GLOBAL LEARNING IMPACT

16k students

16% ESL
65% low-income
78% minority
88% graduate ready for the world

88% graduate

Our graduation rates are much higher than the average 50% rate in schools with similar socio-economic and demographic profiles.

The number of students we serve nationwide. We work with 10 urban school districts to transform schools for the global innovation age.
